

Neighbourhood crime report

Recorded crime summary for SW1A 1AA

This 5-year report summarises 5,705 published incidents within 0.5 km of the searched postcode (Jul 2021 to Jun 2026), and whether the latest year looks like the earlier years in the same search circle.

Read this as a summary of published police data for one postcode-centred search area, not as a safety rating.

Postcode searched	SW1A 1AA	Radius used	0.5 km
Requested report window	Jul 2021 to Jun 2026	Published records returned	Jul 2021 to Jun 2026
Centre point used	51.50101, -0.14156	Generated on	04 Aug 2026
Product tier	5-year report		

Published incidents

5,705

Largest category

Theft From The Person

Biggest difference vs police area

Theft From The Person: a much larger share here

Latest published month

Jun 2026

Main findings

- Theft From The Person was the largest published category, making up about 3 in 10 recorded incidents in the search area (34.0%).
- Compared with the wider Metropolitan police area, Theft From The Person makes up a much larger share of local incidents (34.0% here vs 6.7% across the force area).
- Compared with England and Wales, Theft From The Person makes up a much larger share of local incidents (34.0% here vs 2.3% nationally).
- Latest 12 months returned 1,064 published records; the earlier part of the window averaged about 1,160 records per year. Latest year vs previous year: -833 records.

Important limitations

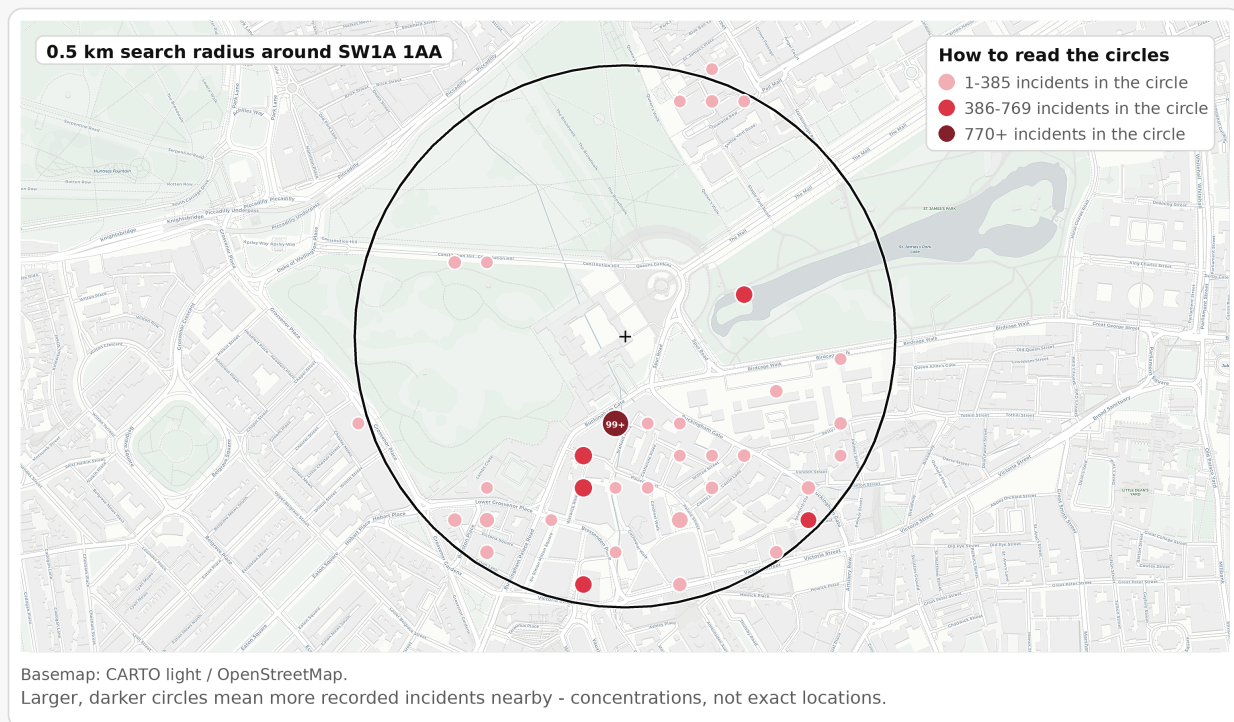

- This report describes recorded incidents in the published dataset, not all crime experienced in the area.
- Published police locations are approximate and should not be treated as exact addresses or exact incident points.
- Outcome labels are shown as published and are not the same as court results or a full case history.
- Recent months can move as police forces revise or backfill published records.

Maps

These maps show the searched area and broad concentrations in the published data. They are designed to stay cautious about location precision.

Concentration

Grouped incident counts from approximate published police points within the searched radius

Largest concentrations

The biggest clusters sit around the most repeated published labels: On or near Buckingham Mews (1,154 records), On or near Palace Place (511 records), On or near Theatre/concert Hall (444 records). These labels are anonymised street references, not exact addresses.

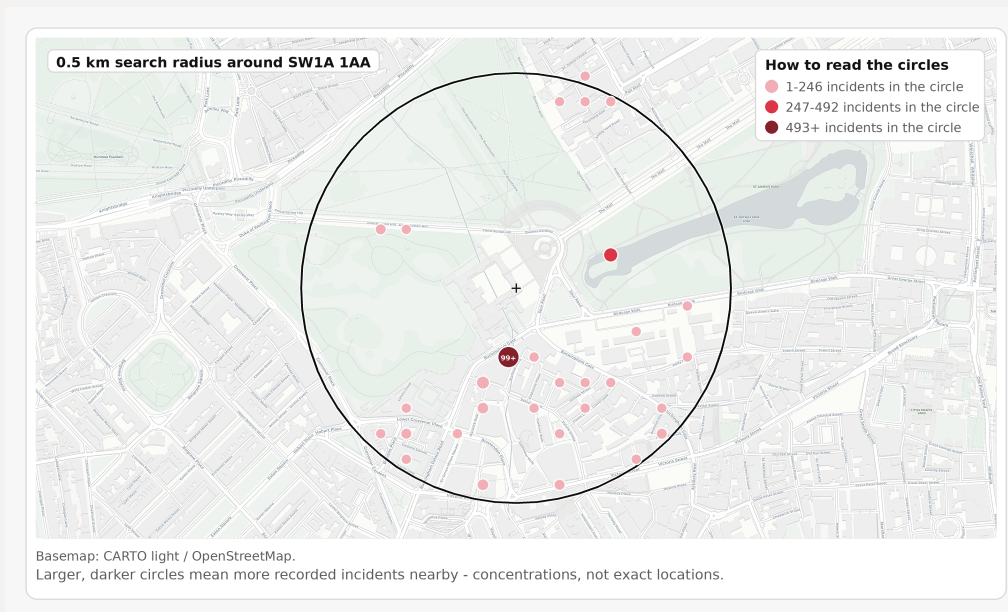

The concentration map groups nearby published points together so you can see broad clusters without making the underlying data look more exact than it is.

Where the largest crime types concentrate

Different crime types usually cluster in different places. These maps repeat the concentration view for the largest published categories in this search circle.

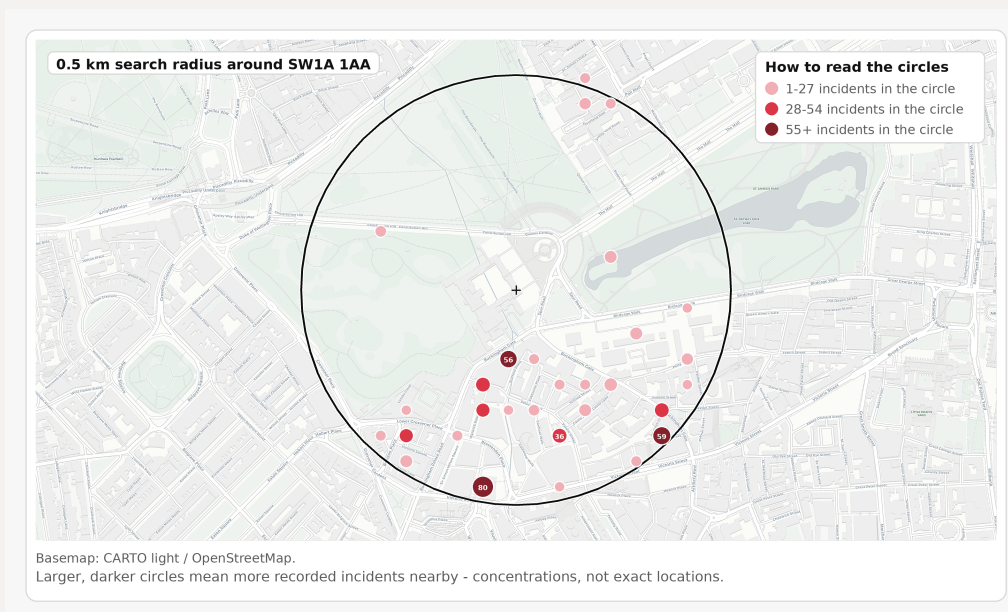

Theft From The Person - 1,937 records

Grouped counts for this category only, within the same searched radius

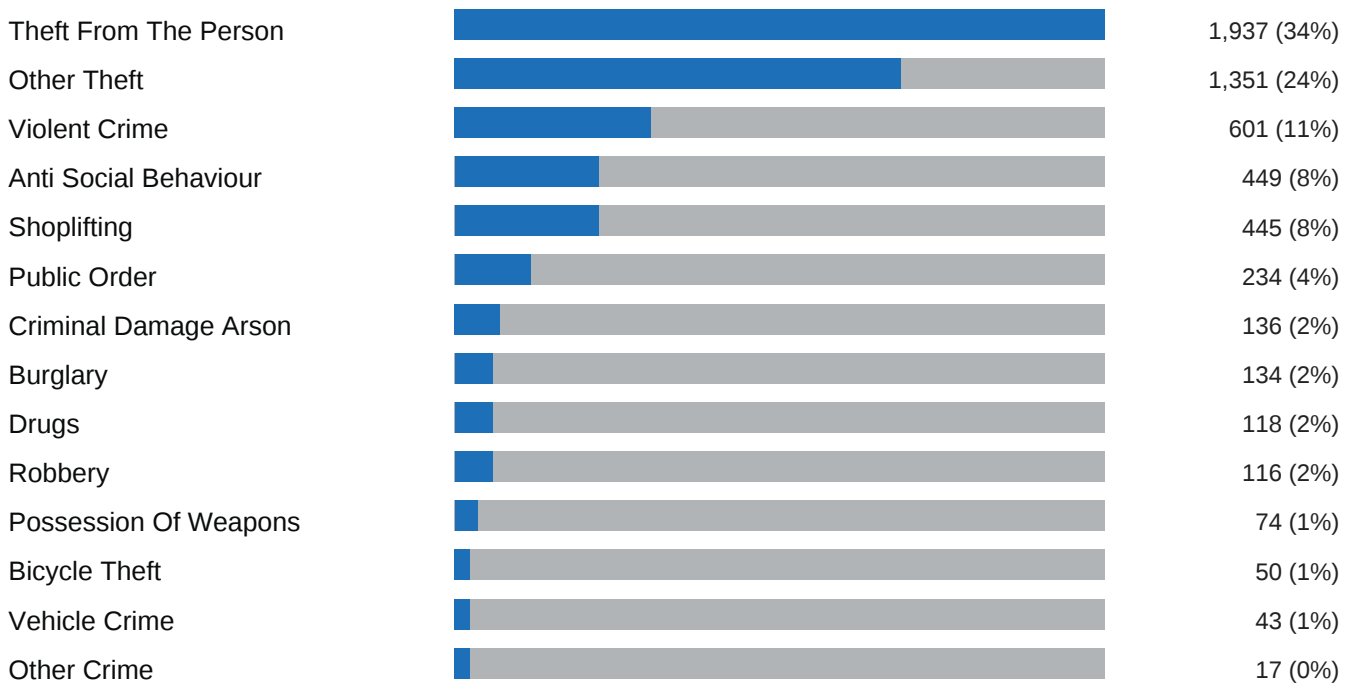

Violent Crime - 601 records

Grouped counts for this category only, within the same searched radius

Published records by category

Every published record in the search circle falls into one of the police data categories below. This chart shows the raw counts for the report window, with each category's share of the local total.

Counts are published records only. Categories follow the police data scheme, so broad groups like violent crime and other theft mix several different incident types.

About the largest categories

Theft From The Person - 1,937 records

Theft from the person is often associated with crowded public places, transport interchanges, and visitor-heavy streets.

Other Theft - 1,351 records

Other theft is a broad category. It often appears in mixed-use areas and can cover several different incident types.

How close to the searched postcode?

Distances are measured to the approximate point each record was published at, not the true incident location, so read these bands as broad closeness.

Compared with the wider police area

This comparison uses the wider Metropolitan police area in the same report window. It helps show whether the search area has a different category mix from the broader force area that covers it.

Published incidents in this search

5,705

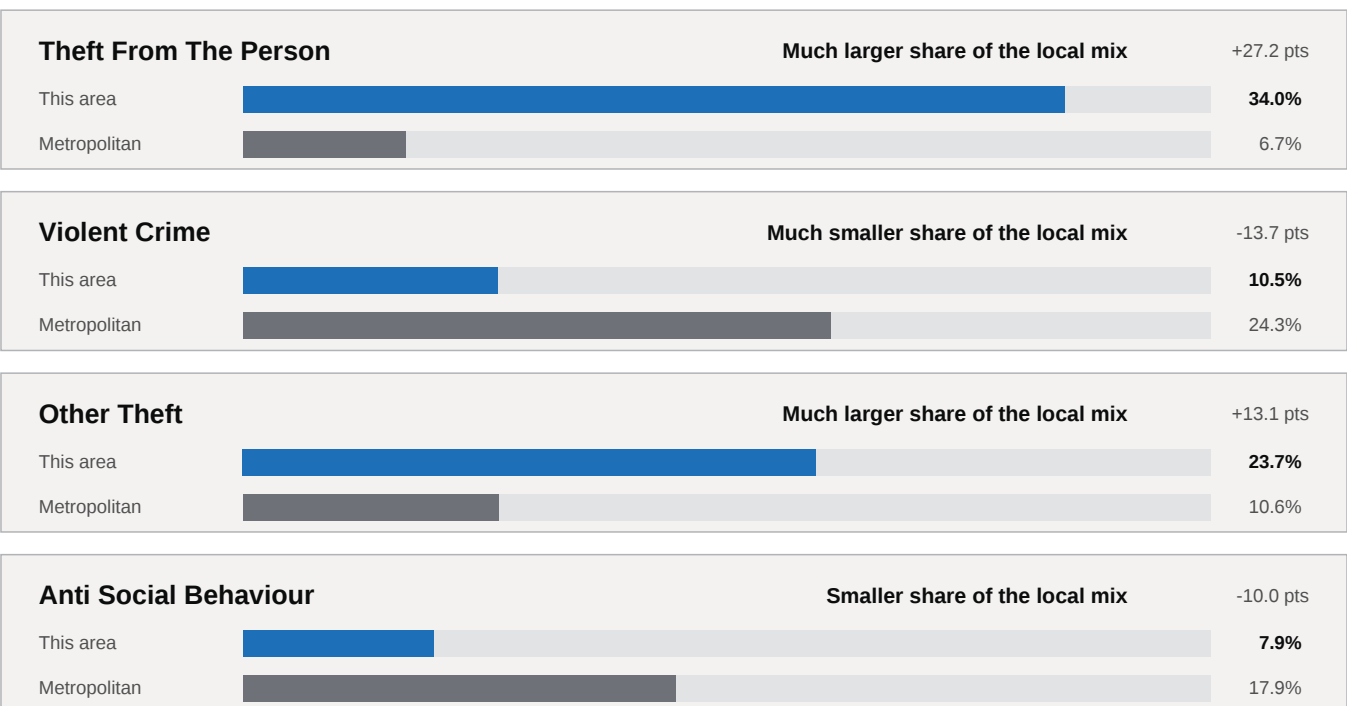

The incidents returned for the postcode-centred search area

Published incidents across Metropolitan

5,702,685

All published incidents across the wider Metropolitan police area in the same window

This area compared with the wider police area

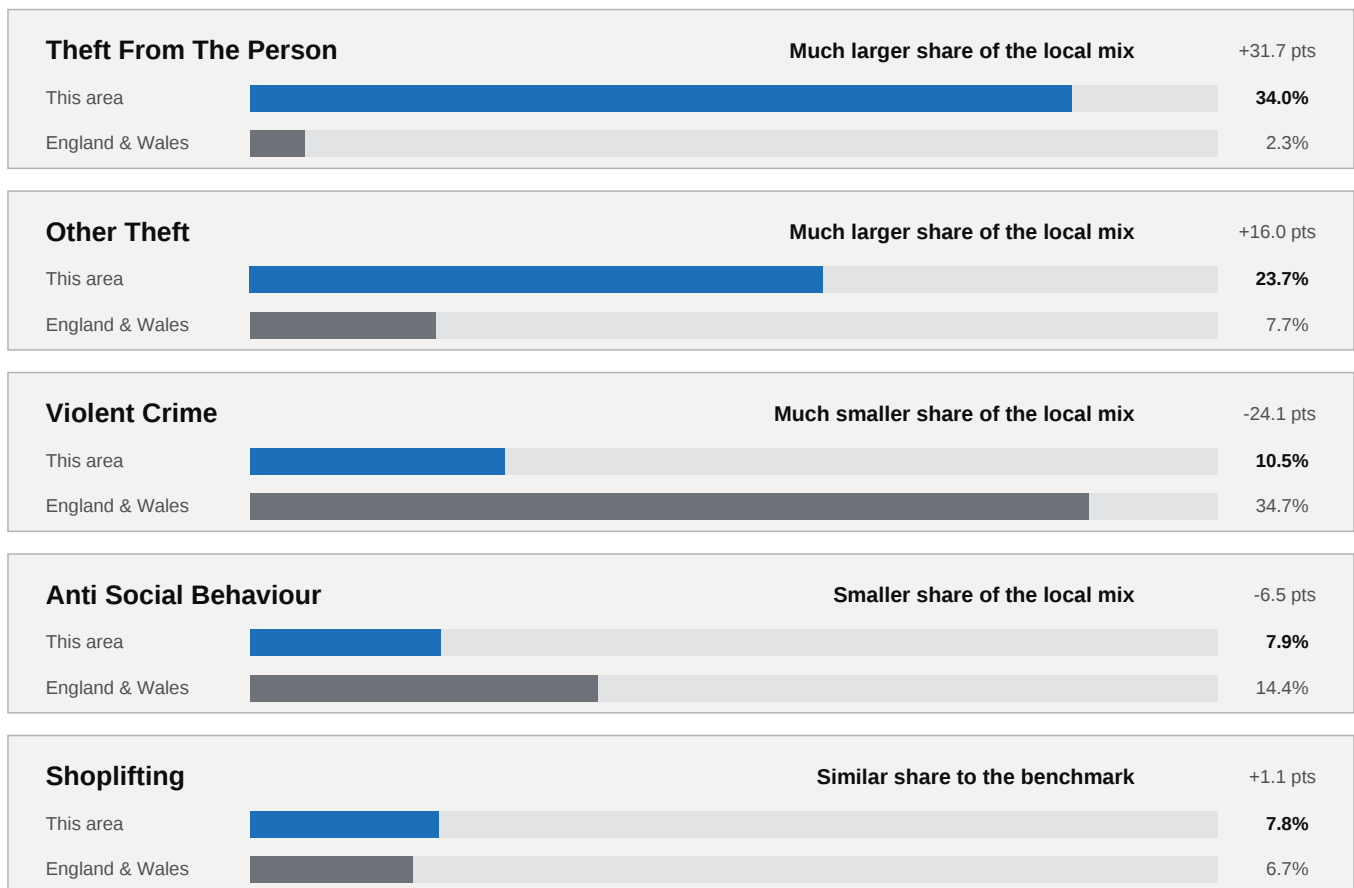

A wider police-area comparison keeps the source and the time window aligned. It still does not account for population, land use, or visitor activity.

Compared with England and Wales

This page compares the local mix of crime categories with the England and Wales pattern. It shows differences in category share, not differences in resident crime rate. The England and Wales benchmark uses all published incidents across England and Wales between Jul 2021 and Jun 2026.

Local share against England and Wales share

What stands out

- Theft From The Person makes up 34.0% of local incidents, far above its 2.3% England and Wales share.
- Violent Crime makes up 10.5% of local incidents, far below its 34.7% England and Wales share.
- Other Theft makes up 23.7% of local incidents, far above its 7.7% England and Wales share.

How to read this page

- This comparison helps describe the local category mix. It is not a score or a ranking.
- Shares always add up to 100%, so one very large category pushes every other category's share down. A smaller share does not mean fewer incidents than elsewhere.
- Differences can reflect land use, transport activity, reporting patterns, and local policing as well as crime conditions.

Categories, location labels, and published outcomes

Theft From The Person

1,937 incidents | 34.0% of local total

About 3 in 10 recorded incidents here were Theft From The Person; across England and Wales the figure is fewer than 1 in 10.

Most repeated location label: On or near Buckingham Mews (742 records)

Much larger share of the local mix

+31.7 pts vs England & Wales

Other Theft

1,351 incidents | 23.7% of local total

About 2 in 10 recorded incidents here were Other Theft; across England and Wales the figure is about 1 in 10.

Most repeated location label: On or near Buckingham Mews (215 records)

Much larger share of the local mix

+16.0 pts vs England & Wales

Violent Crime

601 incidents | 10.5% of local total

About 1 in 10 recorded incidents here were Violent Crime; across England and Wales the figure is about 3 in 10.

Most repeated location label: On or near Theatre/concert Hall (74 records)

Much smaller share of the local mix

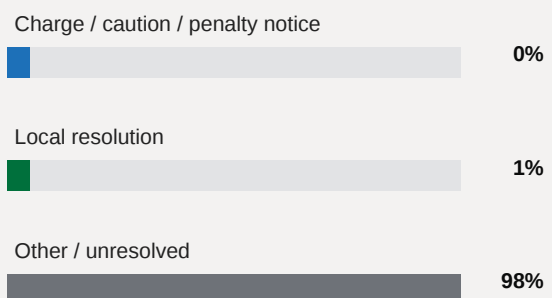

-24.1 pts vs England & Wales

Most repeated labels

These are repeated published location labels, not exact address points.

On or near Buckingham Mews	1,154
On or near Palace Place	511
On or near Theatre/concert Hall	444
On or near Park/open Space	401
On or near Spenser Street	394
On or near Warwick Row	394

Published outcome mix

Across England and Wales in the same benchmark window, 98% of published records were also unresolved or closed without a published charge, so a high local figure is not unusual. Published outcomes do not represent the full life of a case.

Published location labels and published outcomes are useful context, but both are partial. Read them as broad evidence about recorded patterns, not as a complete case history or an exact incident map.

Stop and search in this area

Police forces also publish records of stop and search encounters. These are a measure of police activity in the area, not a second count of crime - a busy stop and search location can reflect patrols and passing footfall as much as local conditions.

Stop and searches in this search

525

Published encounters inside the search circle for the report window

Ending in a recorded outcome

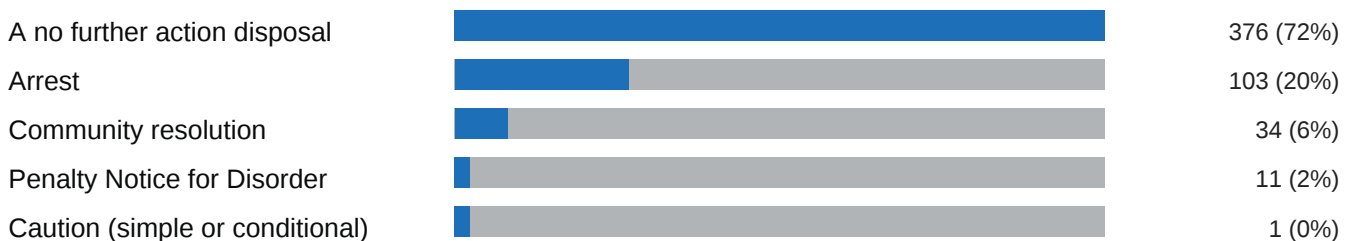

23%

Share with a published outcome such as an arrest, caution, or penalty notice

What officers were searching for

Recorded outcomes

Stop and search locations are approximate in the same way as crime records, and a large share of searches nationally end without a further published outcome. Read this page as context about police activity, not as a verdict on the area.

Trend and how the report was built

This page shows whether published volume changed across the multi-year window. The cover findings also compare the latest 12 months with the earlier years.

Recent 3 months returned 217 published records, compared with 206 in the earlier comparison period. Apr 2026 to Jun 2026 compared with Jan 2026 to Mar 2026

Year-by-year published volume (5-year window)

Latest year vs previous year: -833 records.

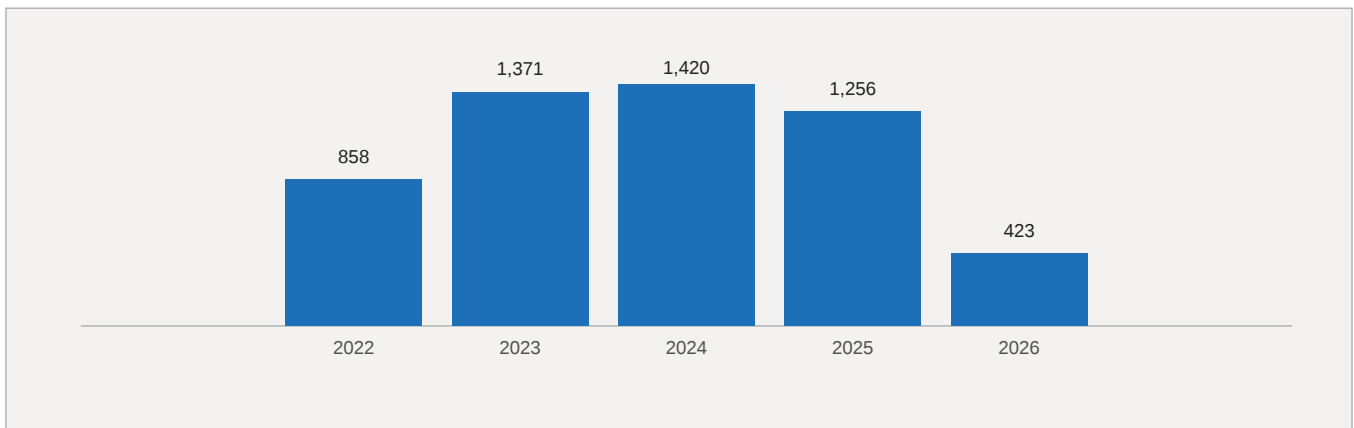

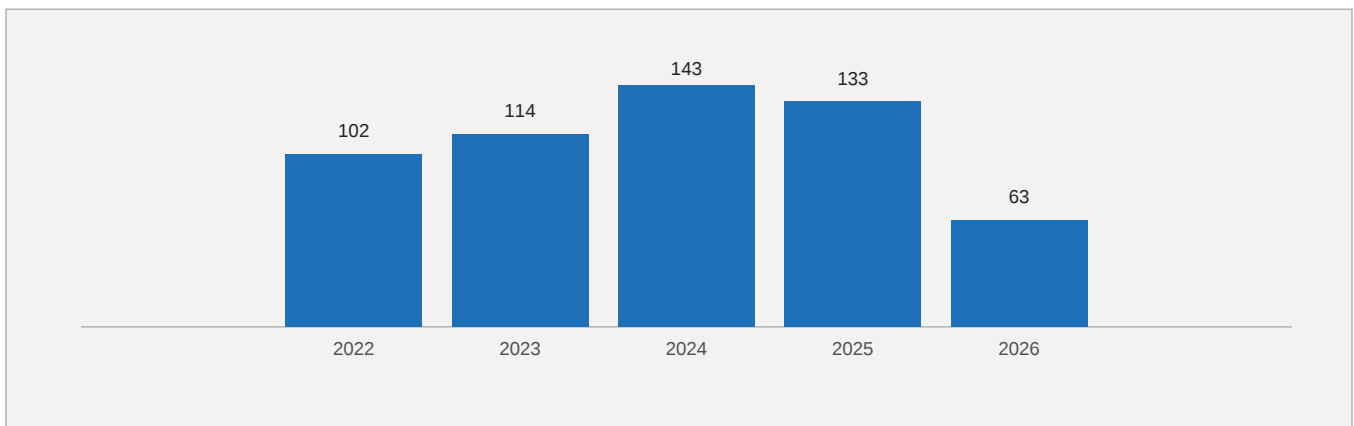

Chart totals use the full report window. If an appendix is included, it lists only the most recent published rows, not every record in the chart.

Violent crime year-by-year (5-year window)

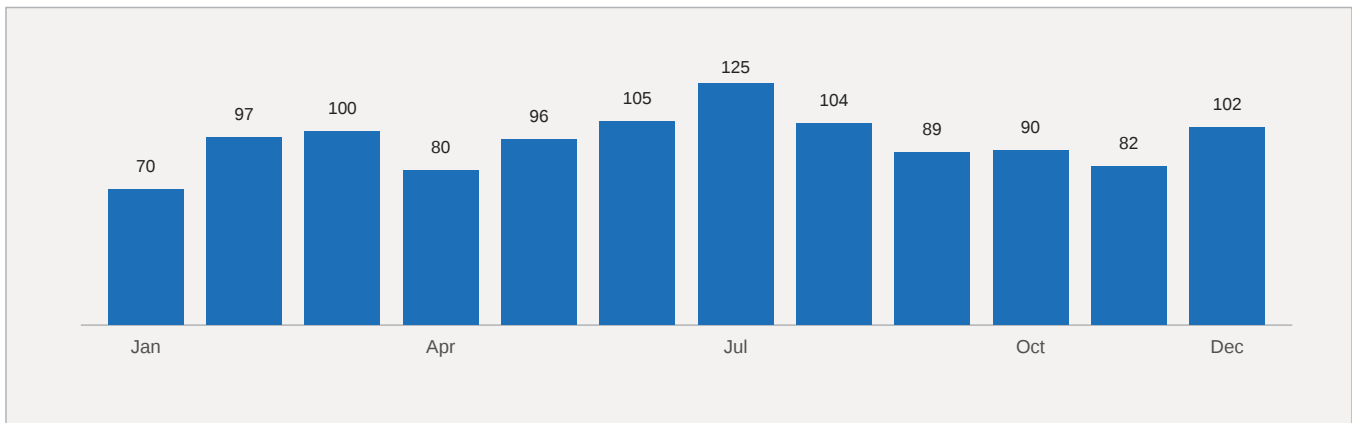

Latest year vs previous year: -70 records.

Only records published in the violent crime category are counted. A missing bar means no published violent crime records for that period, not missing data.

Seasonal pattern - average records per calendar month

Across the window, July averages the most records and January the fewest.

Each bar averages that calendar month across every year in the report window, so it smooths out one-off spikes to show the typical seasonal shape.

Categories rising

- Vehicle Crime: 14 records in the latest 12 months, against an earlier average of about 7 per year (+93%).
- Possession Of Weapons: 24 records in the latest 12 months, against an earlier average of about 12 per year (+92%).
- Public Order: 65 records in the latest 12 months, against an earlier average of about 42 per year (+54%).

Categories falling

- Other Theft: 198 records in the latest 12 months, against an earlier average of about 288 per year (-31%).
- Theft From The Person: 313 records in the latest 12 months, against an earlier average of about 406 per year (-23%).
- Shoplifting: 74 records in the latest 12 months, against an earlier average of about 93 per year (-20%).

Method summary

- Incidents were selected within 0.5 km of the postcode centre (51.50101, -0.14156).
- Police-area comparison uses the constabulary attached to published incidents in the same report window. England and Wales comparison uses the overall published category pattern.
- Category mix benchmarking compares the local share of incidents with the England and Wales share for the same category. The England and Wales benchmark uses all published incidents across England and Wales between Jul 2021 and Jun 2026.

Why the report keeps things cautious

- data.police.uk street-level crime data under the Open Government Licence.
- Query window: 2021-07 to 2026-06.
- No rate per resident is shown because the report does not yet have an official population figure for this exact search shape.

This report describes recorded incidents in the published dataset, not all crime experienced in the area. Published police locations are approximate and should not be treated as exact addresses or exact incident points. Outcome labels are shown as published and are not the same as court results or a full case history. Recent months can move as police forces revise or backfill published records.

The interactive crime map, stop and search map, and force dashboards behind this report are free to use - no account and no paywall. See how this area is changing month by month at:

crimemapsuk.com/crime-map

Appendix

The pages that follow list the individual published records returned by the report query. They are included for transparency and depth. The main report pages should still be read first.

Appendix rows still use shortened location text and should still be interpreted as approximate published data.

Published incident list

Each row represents one published record returned by the report query. Dates reflect the incident month in the source dataset. This appendix shows the most recent 300 records so the PDF stays usable.

Date	Category	Location	Outcome
Jun 2026	Possession Of Weapons	On Or Near Warwick Row	Under investigation
